

## 1. Home Page

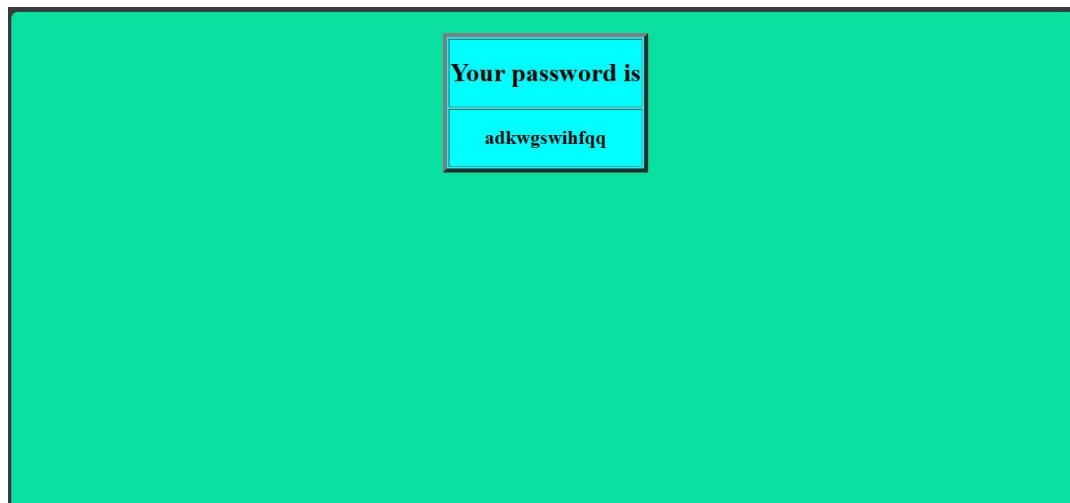

Here,we can select the length we want for the password,and the combination we want including uppercase,lowercase,numbers and special characters.

The screenshot shows a web form titled "Password Generator" centered on a pink background. The form has a light blue border and contains the following elements: a dropdown menu for "length" set to "12", four checkboxes for "Uppercase", "Lowercase", "Special Character", and "Numbers" (all are currently unchecked), and a "Generate Password" button at the bottom.

## 2. Password page

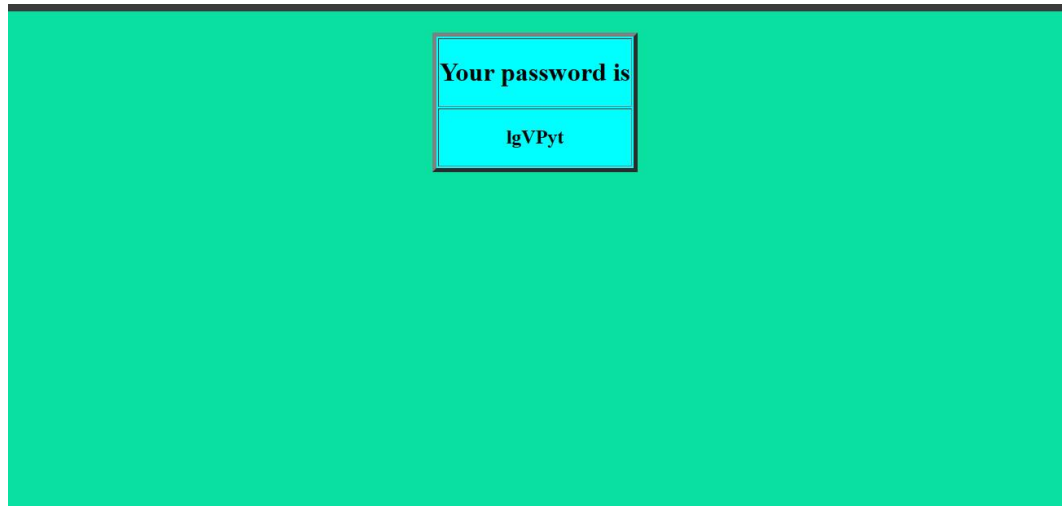

Here,we can get the password which is generated after giving input in home page.

The screenshot shows a web page with a green background. In the center, there is a light blue box with a black border. The box contains the text "Your password is" in bold, followed by the generated password "adkwgswihfqq" in a standard font.

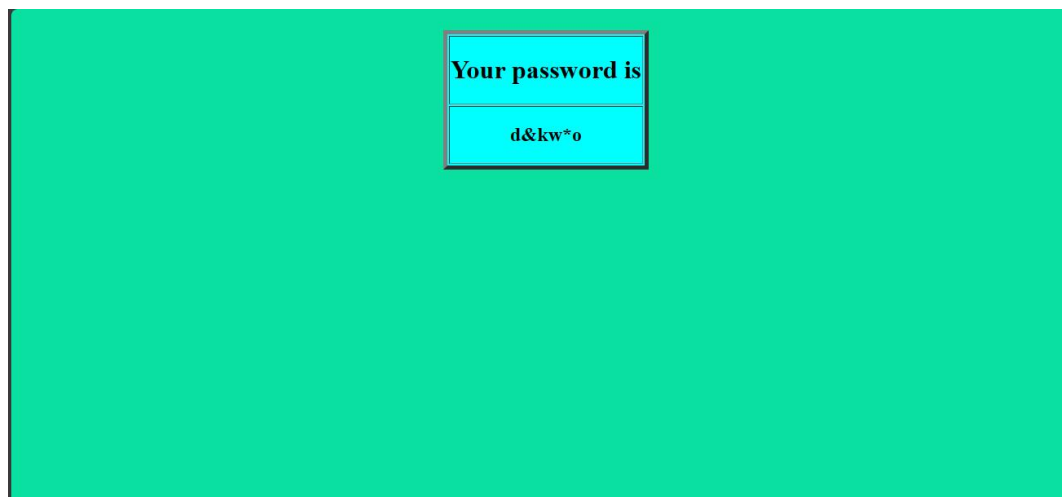

### 3. Uppercase Password

The password generated when selected only uppercase and lowercase by the user.

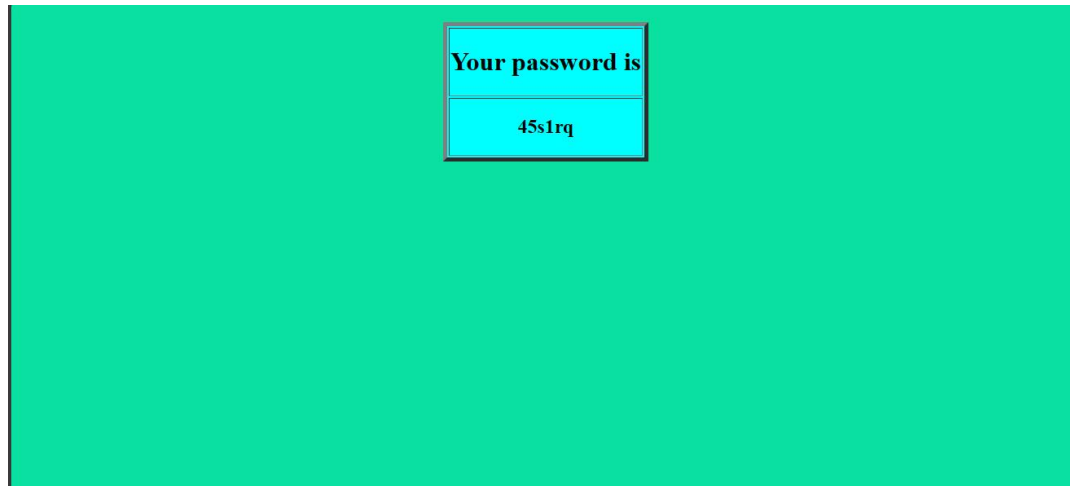

### 4. Special Character Password

The password generated when selected only special characters and lowercase by the user.

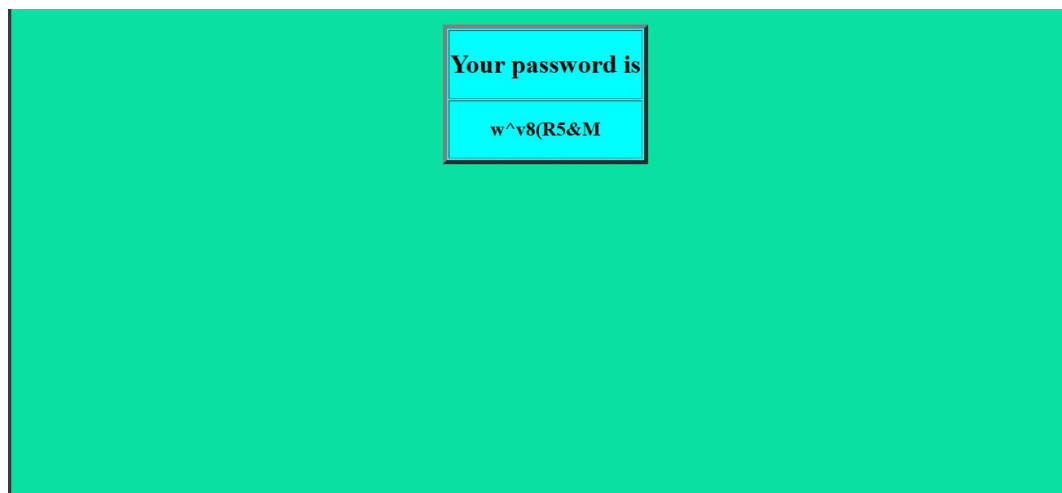

## 5. Numbers Password

The password generated when selected only numbers and lowercase by the user.

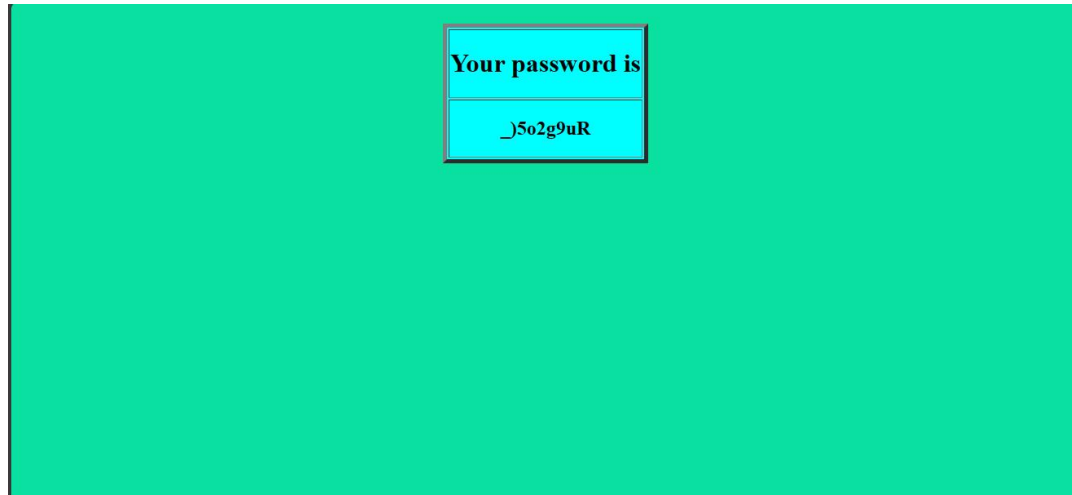

## 6. Combined Password

The password generated when selected only all including uppercase, lowercase, special characters and numbers by the user.

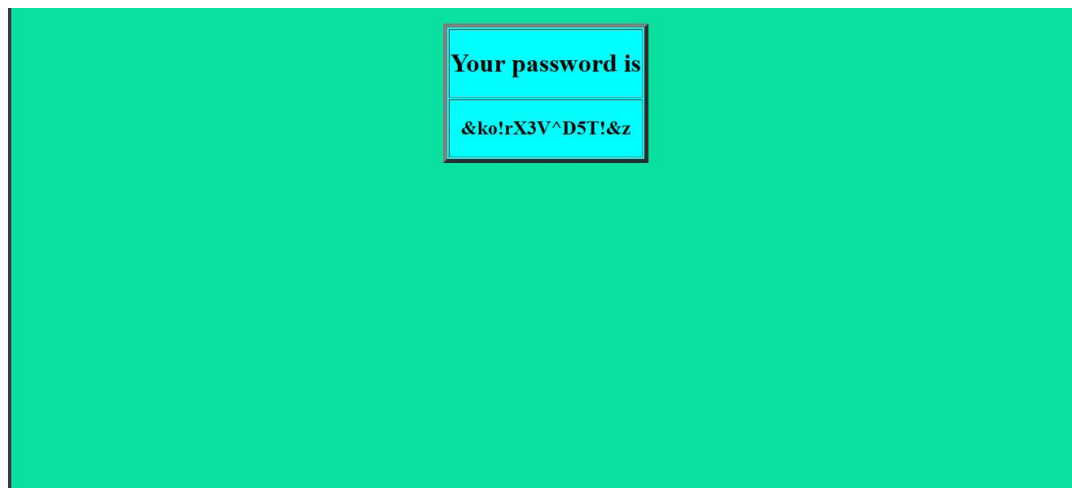

## 7. Nine Digits Password

The password generated when user gave input of length as 9.

## 8. Fifteen Digits Password
